

## **Crypt My Pic, for Android and iOS**

***Keep or share your private pics with your friends safely.***

***Fully Compatible version for Android and iOS***

Jade introduces Crypt My Pic, an app that will help you keep your private and sensitive pictures secure. You don't ever have to worry about your private pictures if you lose your phone.

**Madrid, Spain** – Crypt My Pic uses high security algorithms to encrypt your pictures and keep them private. Only you or the ones you want will be able to see the picture. It allows you to save the encrypted pictures or share them by email with your friends. Android and iOS versions are released and they are fully compatible between them.

You can use it for private and sensitive pictures and also for keeping your bank coordinates safe, so you don't have to take them with you.

Each picture can be encrypted with its own unique password or you can use the same password for some of them.

Key features :

- High encryption algorithms (AES-256).
- Share your private pictures with your friends, and no one else will be able to see them.
- Fully compatible between Android and iOS
- Don't worry if someone takes your phone or you lose it, as they will not be able to see pictures secured with the application.

Platforms

Android 2.2 or higher

iPhone 3GS or higher

iPod Touch 3rd generation or higher

iPad

(For iOS devices it requires iOS 5 or higher)
